GRADING SHEET PROJECT 3

Student names: _____

Submitted on time?	YES / NO
Is compiling and running?	/ 20
Is running properly? Functionality must be complete and correct.	/ 50
Is code documented?	/ 10
Protocol document submitted and complete.	/ 10
Working make file submitted.	/ 5
Correct submission format.	/ 5
Deductions for compiler warnings and memory errors.	/-10
TOTAL	/100

Test:

- client connect to server to establish the ring
- server creates the ring
- clients decide on who creates the first token (initiation)
- clients access message board correctly to read and write messages
- clients use multiple threads to handle message editing and token management separately
- clients can exit the ring at any time without breaking the board
- if all but one client exists, the ring will still work
